PROFESSIONAL SUMMARY

Results-oriented Backend Developer and Medical Laboratory Science student specializing in Node.js and Express.js. Skilled at building secure, scalable server-side applications with a unique focus on integrating technical solutions into the healthcare and fintech sectors. Proven student leader with a track record of managing community-focused digital tools and supporting academic initiatives.

TECHNICAL SKILLS

Backend: Node.js, Express.js, RESTful API Development, User Authentication

Security & Database: AES-GCM Encryption, Data Validation, MongoDB, SQL (Fundamentals)

Tools & Platforms: Git, GitHub, VS Code, Postman, MongoDB Compass

Soft Skills: Strategic Leadership, Community Moderation, Technical Documentation

TECHNICAL PROJECTS

Event & Ticketing System | *Personal Project*

In Progress

Tech Stack: Node.js, Express.js, MongoDB

- Building a full-featured event management platform supporting event creation, ticketing, and attendee management.
- Designing scalable RESTful APIs with role-based access control for organizers and attendees.

Full Bank API — Mock NIBSS Integration | *Personal Project*

2026

Tech Stack: Node.js, Express.js, MongoDB

- Engineered a full-featured banking API simulating real-world NIBSS (Nigeria Inter-Bank Settlement System) interactions.
- Implemented account management, fund transfers, and transaction history with robust validation and error handling.

Library Management System | *Personal Project*

2026

Tech Stack: Node.js, Express.js, MongoDB

- Built a complete library management backend handling authors, books, borrowers, borrow dates, and return tracking.
- Designed a structured data model with full CRUD operations and borrower history reporting.

Secure Fintech Banking Prototype | *Personal Project*

2026

Tech Stack: Node.js, Express.js, AES-GCM Encryption

- Engineered a backend banking system featuring secure registration, encrypted dashboards, and transaction simulation.
- Implemented AES-GCM encryption to protect sensitive data, demonstrating a security-first development approach.

OOU Student Verifier Bot | *Personal Project*

2026

Tech Stack: Node.js, Express.js

- Developed a bot to automate student profile verification via matriculation numbers for the OOU community.
- Reduced manual verification time by an estimated 80%, significantly improving data accessibility for peers.

Spin and Win Giveaway Application | *Personal Project*

2026

Tech Stack: Node.js, Express.js, JavaScript

- Built a promotional web app using weighted probability logic to manage fair and transparent reward distribution.
- Integrated IP and device-locking mechanisms to prevent fraudulent entries, ensuring 100% unique participation per user.

EDUCATION

Bachelor of Medical Laboratory Science (B.MLS) | *Olabisi Onabanjo University (OOU)* Expected 2029

- Focus Areas: Clinical Pathology, Anatomy, and Medical Ethics.
- Active Member, Departmental Academic Committee (2025 – Present).

Professional Certification: Backend Web Development | *TS Academy* Dec. 2025 till present

- Intensive training in scalable server-side architecture and RESTful API design.
- Covered advanced Node.js, Express.js, authentication systems, and database integration.

LEADERSHIP & EXPERIENCE

Academic Committee Member | *OOU Departmental Governance* 2025 – Present

- Collaborating with faculty to organize tutorials and distribute academic resources to 200+ second-year students.
- Serving as a student representative to bridge communication between faculty and the student body.

Senior Prefect | *Heritage of God Group of Schools* Graduated 2023

- Led a prefect body of 20+ students and served as the primary liaison between school administration and a student body of 500+.
- Enforced punctuality and discipline standards, resulting in measurable improvements in morning assembly attendance.
